

# Glossary

## Data Analytics

### Terms and Definitions

---

## A

**Action-oriented question:** In the SMART methodology, a question whose answers lead to change

**Agenda:** A list of scheduled appointments

**Algorithm:** A process or set of rules followed for a specific task

**Analytical skills:** Qualities and characteristics associated with using facts to solve problems

**Analytical thinking:** Identifying and defining a problem, then solving it by using data in an organized, step-by-step manner

**Attribute:** A characteristic or quality of data used to label a column in a table

**Audio file:** Digitized audio storage usually in an MP3, AAC, or other compressed format

**AVERAGE:** A spreadsheet function that returns an average of the values from a selected range

## B

**Boolean data:** A data type with only two possible values, usually true or false

## C

**Cell reference:** A cell or a range of cells in a worksheet typically used in formulas and functions

**Cloud:** A place to keep data online, rather than a computer hard drive

**Context:** The condition in which something exists or happens

**Continuous data:** Data that is measured and can have almost any numeric value

**Cookie:** A small file stored on a computer that contains information about its users

**COUNT:** A spreadsheet function that counts the number of cells in a range that meet a specific criteria

## D

**Dashboard:** A tool that monitors live, incoming data

**Data:** A collection of facts

**Data analysis:** The collection, transformation, and organization of data in order to draw conclusions, make predictions, and drive informed decision-making

**Data analysis process:** Carrying out the six phases of ask, prepare, process, analyze, share, and act in order to gain insights that drive informed decision-making

**Data analyst:** Someone who collects, transforms, and organizes data in order to draw conclusions, make predictions, and drive informed decision-making

**Data analytics:** The science of data

**Data design:** How information is organized

**Data-driven decision-making:** Using facts to guide business strategy

**Data ecosystem:** The various elements that interact with one another in order to produce, manage, store, organize, analyze, and share data

**Data element:** A piece of information in a dataset

**Data-inspired decision-making:** Exploring different data sources to find out what they have in common

**Data life cycle:** The sequence of stages that data experiences, which include plan, capture, manage, analyze, archive, and destroy

**Data model:** A tool for organizing data elements and how they relate to one another

**Data science:** Using raw data to create new ways of modeling and understanding the unknown

**Data strategy:** The management of the people, processes, and tools used in data analysis

**Data visualization:** The graphical representation of data

**Data type:** An attribute that describes a piece of data based on its values, its programming language, or the operations it can perform

**Database:** A collection of data stored in a computer system

**Dataset:** A collection of related data

**Digital photo:** An electronic or computer-based image usually in BMP or JPG format

**Discrete data:** Data that is counted and has a limited number of values

## E

**Equations:** Calculations that involve addition, subtraction, multiplication, or division (Refer to math expressions)

**External data:** Data that lives and is generated outside of an organization

## F

**Fairness:** Ensuring that conditions don't create or reinforce bias

**Field:** A single piece of information from a row or column of a spreadsheet; in a data table, typically a column in the table

**Fill handle:** A box in the lower-right-hand corner of a selected spreadsheet cell that can be dragged through neighboring cells in order to continue an instruction

**Filtering:** Showing only the data that meets a specified criteria while hiding the rest

**First-party data:** Data collected by an individual or group using their own resources

**Formula:** A set of instructions used to perform a calculation using the data in a spreadsheet

**Function:** A preset command that automatically performs a process or task using the data in a spreadsheet

## G

**Gap analysis:** A method for examining and evaluating the current state of a process in order to identify opportunities for improvement in the future

## H

**Headers:** Typically the first row in a spreadsheet that labels the type of data in each column

## I

**Inbox:** Electronic storage where emails received by an individual are held

**Internal data:** Data that lives within a company's own systems

## J

## K

## L

**Leading question:** A question that steers people toward a certain response

**Long data:** A dataset in which each row is one time point per subject, so each subject has data in multiple rows

## M

**Math expressions:** Calculations that involve addition, subtraction, multiplication, or division (Refer to equations)

**Math functions:** Functions that are used as part of a mathematical formula

**MAX:** A spreadsheet function that returns the largest numeric value from a range of cells

**Measurable question:** A question whose answers can be quantified and assessed

**Metric:** A single, quantifiable type of data that used for measurement

**Metric goal:** A measurable goal set by a company and evaluated using metrics

**MIN:** A spreadsheet function that returns the smallest numeric value from a range of cells

## N

**Nominal data:** A type of qualitative data that is categorized without a set order

## O

**Observation:** The attributes that describe a piece of data contained in a row of a table

**Open data:** Data that is available to the public

**Operator:** A symbol that names the operation or calculation to be performed

**Order of operations:** Using parentheses to group together spreadsheet values in order to clarify the order in which operations should be performed

**Ordinal data:** Qualitative data with a set order or scale

**Ownership:** The aspect of data ethics that presumes individuals own the raw data they provide and have primary control over its usage, processing, and sharing

## P

**Pivot chart:** A chart created from the fields in a pivot table

**Pivot table:** A data summarization tool used to sort, reorganize, group, count, total, or average data

**Pixel:** In digital imaging, a small area of illumination on a display screen that, when combined with other adjacent areas, forms a digital image

**Population:** In data analytics, all possible data values in a dataset

**Problem domain:** The area of analysis that encompasses every activity affecting or affected by a problem

**Problem types:** The various problems that data analysts encounter, including categorizing things, discovering connections, finding patterns, identifying themes, making predictions, and spotting something unusual

## Q

**Qualitative data:** A subjective and explanatory measure of a quality or characteristic

**Quantitative data:** A specific and objective measure, such as a number, quantity, or range

**Query:** A request for data or information from a database

**Query language:** A computer programming language used to communicate with a database

## R

**Range:** A collection of two or more cells in a spreadsheet

**Record:** In a data table, usually a row

**Reframing:** Restating a problem or challenge, then redirecting it toward a potential resolution

**Relational database:** A database that contains a series of tables that can be connected to form relationships

**Relevant question:** A question that has significance to the problem to be solved

**Report:** A static collection of data periodically given to stakeholders

**Return on investment (ROI):** A formula that uses the metrics of investment and profit to evaluate the efficiency of an investment

**Revenue:** The total amount of income generated by the sale of goods or services

**Root cause:** The reason why a problem occurs

## S

**Sample:** In data analytics, a segment of a population that is representative of the entire population

**Scope of work (SOW):** An agreed-upon outline of the tasks to be performed during a project

**Second-party data:** Data collected by a group directly from its audience and then sold

**Small data:** Small, specific data points typically involving a short period of time, which is useful for making day-to-day decisions

**SMART methodology:** A tool for determining a question's effectiveness based on whether it is specific, measurable, action-oriented, relevant, and time-bound

**Social media:** Websites and applications through which users create and share content or participate in social networking

**Sorting:** Arranging data into a meaningful order to make it easier to understand, analyze, and visualize

**Specific question:** A question that is simple, significant, and focused on a single topic or a few closely related ideas

**Spreadsheet:** A digital worksheet

**SQL:** Refer to Structured Query Language

**Stakeholders:** People who invest time and resources into a project and are interested in its outcome

**String data type:** A sequence of characters and punctuation that contains textual information (Refer to text data type)

**Structured data:** Data organized in a certain format such as rows and columns

**Structured thinking:** The process of recognizing the current problem or situation, organizing available information, revealing gaps and opportunities, and identifying options

**SUM:** A spreadsheet function that adds the values of a selected range of cells

## T

**Technical mindset:** The ability to break things down into smaller steps or pieces and work with them in an orderly and logical way

**Text data type:** A sequence of characters and punctuation that contains textual information (Refer to string data type)

**Third-party data:** Data provided from outside sources who didn't collect it directly

**Time-bound question:** A question that specifies a timeframe to be studied

**Turnover rate:** The rate at which employees voluntarily leave a company

# U

**Unfair question:** A question that makes assumptions or is difficult to answer honestly

**United States Census Bureau:** An agency in the U.S. Department of Commerce that serves as the nation's leading provider of quality data about its people and economy

**Unstructured data:** Data that is not organized in any easily identifiable manner

# V

**Video file:** A collection of images, audio files, and other data usually encoded in a compressed format such as MP4, MV4, MOV, AVI, or FLV

**Visualization:** (Refer to data visualization)

# W

**Wide data:** A dataset in which every data subject has a single row with multiple columns to hold the values of various attributes of the subject

# X

# Y

# Z
